4 people have recommended Wen Liu

"I had the pleasure to work with Wen for one year at Cisco Learning Network department in Cisco. As mentioned by others, Wen has a warm personality that allows anyone to easily pull up a chair to discuss the work he's doing for or with you. Sometimes you could feel the pressure in the room as deadlines approached but Wen was always optimistic and hard working. He does great work and is a creative guy. I believe he's right where he belongs, in the creative industry and always growing."

— **Keith Bosworth**, *Project Manager, Cisco*.

"Wen is a great visual, interaction and the truly outstanding UI/UX designers. We worked together on various projects at Cisco. He was a great resource to bounce ideas off of, easy to collaborate with and splitting up the work load which helped complete the project earlier than the deadline. He is extremely bright and easy to get along with, an ideal addition to any creative team."

— **Madhukar Madicheeti**, *Web/UI Developer, Cisco*.

"Wen did an exceptional job on the recent project where he worked on visual design and motion graphics. As I remember, Wen was a very productive person. Wen is a loyal, innovative, well educated and strong expert. Deadline oriented and insightful designer with a very strong problem solving skills. "

— **Daniel Samson Joseph**, *Senior UX Designer, Cisco*.

"Wen Liu is fantastic Visual/UI designer who ensures that he completely understands the entire user "story" and then translates those users' needs into a design/implementation. Wen handled everything from reviewing the users' needs, wire-framing ideas complete with all necessary styling to implementing the UX for our project team to wire into our platform. In a relatively short period of time, Wen was able to help take our project from a "prototype" state to one that exceeds all our expectations and our users love. While you will be thrilled with all of his skill sets, it is his caring and dedication that set him apart from everyone else. He took great pride and ownership of everything he did, and worked his tail off throughout. My one regret is that we did not have the ability to pull him in full time at the end of the project! I highly recommend Wen and would be happy to provide additional information on his performance if needed."

— **Jun Oh**, *Senior Product Manager, Cisco*.

Dear Wen,

Thank you for participating in the SunSpec Alliance Solar Saving Program with UX/Visual designer position during the months of January, February and March 2014.

SunSpec appreciates the contributions you made to the organization in the areas of video production, social media, UX design and website development. I believe you were able to some important job skills in the areas of solar energy, web site management, and working with a team. Finally, I really appreciate your passion and desire to succeed. Keep it up.

Best of luck in your future professional endeavors.

To Whom It May Concern:

This letter is to recommend Wen Liu. Wen was a student in my courses in the Art Department at CSUEB. Specifically, he studied Digital Imaging with me and also the Senior Project Course. That is a course in which each student makes a proposal for a project using the skills they have learned previously.

Wen's work in both classes was excellent. He listened well in class and was not afraid to try something outside his "comfort area". His senior project was a bit of a leap but he managed it well with lots of work. He needed his skills in Adobe Photoshop, Illustrator, Flash, AfterEffects as well as Final Cut Pro. He used them well.

Wen is quiet but very attentive and works well with other students. He is pleasant, curious and works very hard.

I recommend him. If you have any questions, please feel free to email me.

Sincerely,

A handwritten signature in black ink that reads "Sunny Dear". The signature is fluid and cursive, with a long horizontal line extending to the right.
